

## Innovative solutions for specialized transportation and heavy equipment

Power-Packer is known for:

- Truck cab suspension, tilt actuation, and latches
- Off-highway stabilization products
- Automotive mini-hydraulics
- Truck and trailer leveling systems
- Medical manual cylinders and more

But you may be surprised to learn that we are part of a company that makes a lot of other products, too. Many of these products have application in the specialized transportation and heavy equipment markets.

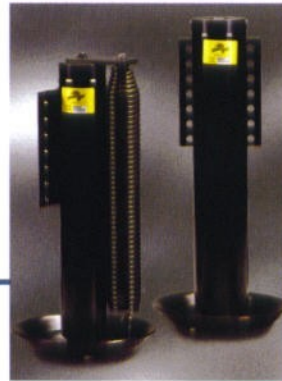

When we say, 'We have an engineered solution,' we are drawing on expertise and innovations in a variety of markets and could have a solution that's just right for your application.

### Stabilization and leveling

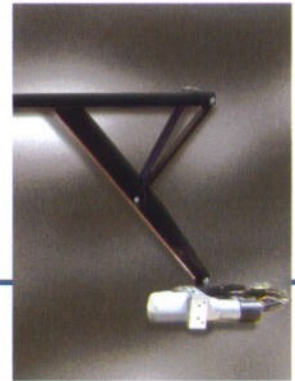

From compact jacks to fully-automatic, heavy-duty hydraulic cylinders, our line of leveling and stabilization systems cover a full range of heavy equipment needs. Engineered for severe operating environments and maximum operator control, our systems deliver robust leveling and stability while providing innovative safety for personnel and equipment.

*Air-powered hydraulic landing gear systems.*

*Hydraulic and electric leveling jacks.*

*Stabilization jack with mini-hydraulic actuation.*

### Convenient access and storage solutions

We design and manufacture power and manual step systems to accommodate personnel access. We also make rugged storage solution products that provide ready access and secure storage of equipment for interior or exterior application on specialized vehicles and heavy equipment.

*Ball-bearing and roller-bearing slideout utility and cargo trays.*

*Electric and manual entry steps.*

*Slideout battery trays in many sizes.*

### Room expansion

Extending useable space beyond the footprint of any specialized vehicle increases the vehicle's function. We design and build slideout compartments and rooms that allow you to take specialized equipment to the next level.

*Room slideout systems to move a small compartment or a full wall.*

*Fully developed, proven actuation systems.*

*All systems include state-of-the-art controls.*

**POWER-PACKER®**

You have an application. We have an engineered solution.
